**MEDREG infrastructure investments report**

MILAN, ITALY – Infrastructure investments in the Mediterranean region: MEDREG calls for a new approach. In a report called “Regulatory options for the stimulation of infrastructure investments - Fact finding and review of challenges in investment in infrastructure”, MEDREG assesses the level of development of power systems and identifies priorities and challenges for the stimulation of relevant investments in the Mediterranean region.

MEDREG posits that to stimulate investment and ensure the coherence of choices, it is necessary to clearly assess the priorities at national and regional levels.
